

Christmas Toys: Dino-Mania

Poseable 3D Dinosaur Puzzles from Bumblebee Toys set to be a Christmas favourite

Children love dinosaurs. There's something about the huge beasts that stalked the earth millions of years ago that appeals to all ages. A new online company, Bumblebee Toys, has launched a range of 3D Dinosaur Puzzles that are set to capture children's imagination and turn the living room into a prehistoric playground this Christmas.

Each puzzle is made up of more than 30 separate interlocking pieces from which a big 3D dinosaur measuring up to 50cm tall can be constructed. There are three different dinosaurs: the terrifying Tyrannosaurus, the spiky Stegosaurus and the flying Pteranodon.

What sets these dinosaur puzzle kits apart is that each one can be constructed in several distinct poses, encouraging imaginative play and keeping children involved for hours.

"Our 3D Dinosaurs are really hands-on toys, they promote inventive and involving play," says Stephen Watts of Bumblebee Toys. "Because they are well made they are destined to be passed on to other family members and become perennial favourites."

The puzzle kits are made from sturdy, recycled and recyclable cardboard and are printed with child-friendly vegetable inks. They can easily be taken apart for storage and re-assembly. Full instructions are included in the packaging to ensure parents will be able to help younger children build and move the puzzles.

The 3D EcoKit Dinosaurs are priced at £13.75 plus delivery and are available from www.bumblebeetoy.com.

Bumblebee Toys is a family company specialising in high quality toys made in the UK and Europe. While its products are only available online, its website aims to give the customer the experience of a friendly toy business with the convenience of modern internet shopping. All its products are sourced from manufacturers using sustainable and recyclable materials, who share the company's passion for innovative toys designed to stimulate, entertain and educate the modern child.
